

A message from Mike Morgan

I am asking all Members to take a few minutes and Write/Email our MP's and if you can find the time request a personal meeting with them. It became obvious when Myself and our Vice-President Mike Wallace met with Pamela Goldsmith-Jones on May 14th the lack of understanding of existing gun law and the proposed Bill C-71 effects on the law-abiding Citizen. Pamela assured me that the Squamish DFO office would not be closing, well it is. This will not help our fisheries in our area when the officers are redeployed to Steveston. Monthly I have been requesting a follow up meeting with Pamela and her office has not arranged to date. Pamela stated she is the only Rural MP for the whole Liberal Caucus, I find this very scary. All the police officers I have talked to or heard talk on this topic agree that Bill C-71 will not affect the criminal only the law-abiding citizen. I emailed Ralph Goodale in May and attached some gun law that our government does not use and all I received back was a Thank You, I copied Pamela and our MLA Jordan Sturdy. Jordan made time to phone me and we had a very good discussion at the end which he stated I could call him anytime on Provincial issues. If anyone would like to read the email to Ralph please email me and I will send you a copy. Pressure politically is the only way we can get positive change. Understand things like if your doctor **ever states** in your medical records you are suffering any form of stress (sleeping issues, rash, etc.) you could be banned from owning a firearm for LIFE with no recourse.

Funding to put more policing boots on the ground would be more beneficial to public safety.

Please take a few minutes, they could be very important in the years to come for all of us that like to shoot firearms in any recreational activity.

Mike Morgan
